# 1 General Information

## 1.1 Welcome

Thank you for choosing C332 CDMA 1X Digital Mobile Phone.

To guarantee the mobile phone always in its best condition, please read this manual carefully and keep it for future use.

The pictures, symbols and contents in this manual are just for your reference. They might not be completely identical with your phone. Please subject to the real object. ZTE operates a policy of continuous development and reserves the right to update and modify the technical specifications in this document at any time without prior notice.

## 1.2 Security

- If your mobile phone is lost or stolen, please report to your service provider or agencies of banning the use of your lost UIM card and phone, which will protect you from economic losses resulted from unauthorized use.

You need to provide the phone's ESN number labeled. You

---

can see ESN number after removing the battery. Please keep ESN number for future use.

- To prevent your mobile phone from illegal use, please take the security measures as follows:
  - Set PIN code of the UIM card.
  - Take it with you as you can.

## 1.3 Safety Warnings

### To the Owner

- Some electronic devices are susceptible to electromagnetic interference sent by mobile phone if inadequately shielded, such as electronic system of vehicles. Please consult the manufacturer on the device before using the phone if necessary.
- Operating of mobile phone may interfere with medical devices like hearing aides and pacemakers. Please always keep the mobile phone more than 20 centimeters away from such medical devices when the phone is powered on. Do not carry the mobile phone in the breast pocket. Power the mobile phone off if necessary. Consult a physician or the manufacturer on the medical device before using the phone.
- Be aware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories, where there

---

are explosive gases or explosive products being processed, because even if your phone is in standby mode, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.

- Pay attention to traffic safety. Do not use your mobile phone while driving. Park before making or answering a call.
- Store the phone out of the reach of little children. The phone may cause injury if used as a toy.

### **Mobile Phone**

- Please use original accessories or accessories that are authorized by the manufacturer. Using any unauthorized accessories may affect your mobile phone's performance, and violate related national regulations about telecom terminals, or even endanger your body.
- If you want to clean your phone, please use clean fabric that is a bit wet or anti-static. Do not use harsh chemical cleaning solvents or strong detergents to clean it. Turn off your phone before you clean it.
- As your mobile phone can produce electromagnetic field, do not place it near magnetic items such as computer disks.
- Using the phone near electrical appliances such as TV, telephone, radio and personal computer can cause interference, which affects the function of the phone.

---

- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from leaking into your phone.
- Do not drop, knock or harshly treat your phone. Rough handling can break internal circuit boards.
- Do not connect the phone with other unauthorized peripheral equipments.
- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Do not charge the mobile phone without battery.
- On occasion of emergent calling, keep your phone in status of power on and in area of service. On the condition of standby, press the key to enter emergency phone number, and then press **Send key**  to make a phone call.

### Battery Using

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- Never use any charger or battery damaged or worn out.

---

- Return the wear-out battery to the provider or put it in the appointed recycle place. Do not put it in familial rubbish.

**Warning:** If the battery is broken, keep away from content. If it taints your skin, wash your skin with abundant fresh water and ask doctor for help if necessary.

### **Safety and General Using in Vehicles**

- Before making or answering a call, you should pay attention to the local laws about using wireless mobile phones and take them into account in practical use.
- Safety airbag, brake, speed control system and oil eject system shouldn't be affected by wireless transmitting. If you do meet problems above, please contact your automobile provider.
- Please power off your mobile phone when refueling your automobile, and so do the place where duplex wireless equipments are banned. Don't put your phone together with flammable or explosive items, as inner spark may cause fire.

### **In Aircraft**

- Follow the restrictions in aircraft. Wireless devices can cause interference in aircraft.
- Please power off your mobile phone before taking off till landing.

In order to protect airplane's communication system from interference, it is never allowed to use mobile phone when it is in

---

flight. Using mobile phone before the plane taking off should get aircrew's permission according to safety regulations.

## **1.4 Limit Warranty**

The warranty does not apply to defects or errors in the product caused by:

- (a) Reasonable abrasion.
- (b) Misuse including mishandling, physical damage, improper installation, unauthorized disassembly of the product.
- (c) Water or any other liquid damage.
- (d) Any unauthorized repair or modification.
- (e) Power surges, lightning damage, fire, flood or other events outside ZTE's reasonable control.
- (f) Use of the product with any unauthorized third party products such as generic chargers.
- (g) Any other cause beyond the range of normal usage for products.

End User shall have no right to reject, return, or receive a refund for any product from ZTE under the above-mentioned situations.

This warranty is end user's sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to

---

the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

## **1.5 Limitation of Liability**

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using this product, whether or not ZTE had been advised, knew or should have known the possibility of such damages.

---

**Note:** To “press” the key in this manual means to press the key and release it. To “hold” the key means to keep pressing the key for two seconds or more.

## 2.2 Instruction of Interface Icon

Icon	Indication
------	------------

---

	Signal strength
	Earphone in use
	Keypad locked
	Roaming
	New message
	New urgent message
	Ring + Vibration
	Vibration
	Silence All
	Alarm
	Power indicator

## 2.3 Technical Parameters

<b>Handset</b>	
Type	ZTE C332
Dimensions	Width×Height×Thickness 46mm×104mm×13mm
Weight	About 70g(Battery Included)
<b>Battery</b>	
Continuous standby time	About 80h~160h (Subject to Network)
Continuous talk time	About 2h~4h (Subject to Network)

**Note:** Please refer to the real phone for other relative parameters of the battery and charger.

---

## 2.4 Battery

The attached Li-ion battery along with the phone can be used after unpacking. For the first three times, please use up the power and charge it fully for a new battery to perform well.

### 2.4.1 Remove and Installation of Battery

- ◆ Remove ① (1) Press and push the back-cover of the phone down to release and remove it off the phone. (2) Put finger on the top finger grips, and then lift up the battery from the finger grips to remove the battery.

- ◆ Installation ① (1) Replace the battery into the battery slot, to be noted that the lower end of the battery firstly inserted. (2) Put the back-cover of the phone flatly upon the body of phone. Direct the back cover towards the locking catches on the both sides of the phone and push the back-cover of the phone upward to lock the cover into its place.

#### 2.4.2 Charging the Battery

- ◆ Plug out rubber away (turn 180° as shown in the picture) from the jack on the bottom of the handset and connect the lead from the charger to the socket on the bottom of the phone.  
(Note: The side with arrow should be upright while connecting).
- ◆ Connect the charger to a standard wall AC socket.
- ◆ Meanwhile, the charging indicator in up-right corner of the display flops cyclically, indicating the charging is going. In

---

power-off mode while charging, the display only shows the charge indicator. If the battery is completely flat in storage or used up, it may take for a while before the charging indicator appears on the display or any calls can be made.

- ◆ When the charging indicator on the screen stops flopping, the charging is completed. The charging takes usually up to 2 ~ 3 hours. In the process of charging, it is a normal phenomenon that the battery, phone and charger get into hot accordingly.
- ◆ After the completion of charging, disconnect the charger from the phone and AC socket.

**Note** ◻

- When it is in charge, place the phone on condition of good ventilation and temperature between -5°C ~ 45°C. Ensure to use the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.
- When the phone is automatically switched off or indicates the alarm information of power shortage, please charge the battery in time.
- The duration time of the standby status or conversation of the phone is based on ideal working environment. In practice, the working time of battery varies with network condition, working environment and application methods.

---

## 2.5 Connecting to the Network

### 2.5.1 UIM Card

Before using the phone, please insert effective UIM (User Identity Module) card into the phone.

All the information related to the network connection is recorded in the metal plane area of UIM card together with the information you stored in your contacts in the UIM card. The UIM card can be inserted into any CDMA phone to use (new phone automatically reads UIM card).

Please do not touch the metal plane area of the card to avoid missing and damaging information in the card and put UIM card in place far away from electricity and magnetism.

**Warning**  Please power off the phone before taking out UIM card. It is prohibited to insert or taking out UIM card in the condition of connecting with external power.

### 2.5.2 Insertion and Extraction of UIM Card

- ◆ Power off the phone, remove the battery and other external power.
- ◆ Insert UIM card into UIM card slot in the phone.
- ◆ Pull out UIM card out of slot, as shown in picture hereinafter.

### 2.5.3 Power on/off Phone

Press and hold **End key** to power on/off the phone. The phone will check whether UIM card inserted well or not. And then follow the prompt indication on the display:

**Enter PIN**—Key in PIN code of UIM card if it is set.

**Searching**—Search appropriate network connected.

### 2.5.4 PIN Code

To set PIN code (personal identification number) is to avoid the illegal usage of UIM card.

To input PIN code of UIM card and press **OK key** to confirm to start on using phone. If inputting wrong PIN three times continuously, UIM card will be locked by network.

**Note** ☐ The network provider offers you PIN code (four to eight

---

digits). You should change PIN code as soon as possible for security.

To set PIN code, see “7.4 Security Settings”.

### 2.5.5 Connecting the Network

After powering on and inputting PIN code, the phone automatically searches the network available and in state of standby mode.

Besides sending and receiving calls, you can also do:

- ◆ Press **Left select key** or **OK key** to enter main **Menu**.
- ◆ Press **Right select key** to enter **Names** menu.
- ◆ Hold **# key** to lock phone's keypad.
- ◆ Hold **\*** **key** to enable/disable viration mode.
- ◆ Hold **Up key** to set the phone in **Silence All**.
- ◆ Press **Up key** to enter **Messages** menu.
- ◆ Press **Down key** to enter **Ring** menu.
- ◆ Press **Left key** to enter **Toolkit** menu.
- ◆ Press **Right key** to enter **Games**.
- ◆ Press **Send key** to enter recent All Calls list.

---

**Note:** In state of key lock, to make use of phone, unlocking code should be input prompted by phone on the display.

EEC Confidential

---

## 3 Basic Operations

### 3.1 Making a Call

Please ensure that you are in the place where the signal can be received. Examine network signal strength icon on the screen.

The more the indication bars, the stronger the intensity of receiving signal is. If there is no bar, please move to the place where the intensity of receiving signal is better. Sometimes, you only need to change the direction.

#### ◆ Making a National Call

Press **Number key** to key in phone number, and add area code when making a long distance call (no need to add area code when dialing local number in some area). Press **Send key** to call out. Press **End key** to end the call and conversation.

---

#### ◆ **Making an International Call**

Enter the country code, area code (without the leading 0) and the complete telephone number you want to dial, press **Send key** to call out.

Before the country code, hold “**0**” **key** to enter the international prefix “+” (the character “+” replaces the international access code) or key in international prefix e.g. “00” of international call directly.

Country code + Area code + Telephone number

0086 755 26770000

#### ◆ **Making Recent Calls**

All calls you recently dialed, received or missed are saved in your phone. All numbers are grouped as Missed Calls, Received Calls and Dialed Calls. When the list is full, the oldest number will be erased automatically when new record is coming.

You can check the list as follows:

- ❖ In standby mode, press **Send key** to view All Recent Calls.
- ❖ The number listed in can be directly dialed by pressing **Send key**.

#### ◆ **Making Pause Calls**

---

You can make use of pause call to dial an extension or voice service call.

E.g. Key in phone number, press **OK key** to select “P” on the display (character “P” added accordingly), and then key in number afterwards. Press **Send key** to dial the first number, when connected, press **Send key** again to dial the second number automatically. “P” can be used for not once only.

## 3.2 Answering a Call

When a call is incoming in standby mode, the phone will offer corresponding ringer or vibration to prompt according to your settings. With the number already saved in Names, the phone also shows the name of caller meanwhile.

- Press **Send key**  to answer an incoming call.
- Press **End key**  to end a call and the call duration is temporarily displayed.

See “7.3 Call Setting” or refer to other ways of answering calls for your option as follows.

---

### 3.2.1 Handset Autoanswer

You can set handset to answer an incoming call automatically.

- Select **Menu**→ **Setting**→ **Call Setting**→ **Auto Answer**.
- Select **On/Off**, and press **OK key**. The phone can be connected in 5 seconds.

### 3.2.2 Setting Any Key Answer

- Select **Menu**→ **Setting**→ **Call Setting**→ **One-Touch**.
- Select **On/Off**, and press **OK key**.

An incoming call can be answered by pressing any key except **End key**, **Left /Right select key**.

### 3.2.3 Incoming Call Silence

- When a call is coming, press **Right select key** to select **Mute/Unmute** the ringer tone.
- This function silences the current incoming call only. The phone will ring normally as next call coming.

---

## 3.3 In Conversation

### 3.3.1 Silence in Conversation

During conversation, you can select **Option (Names, Messages or Record)** or **Mute** displayed. Select **Mute** to let the other party temporarily not hear your voice; Select **Unmute** back to normal. You can also enter **Names, Messages** or **Record** during a conversation.

### 3.3.2 Adjusting Volume in Conversation

Press **Left/Right key** to adjust volume of Earpiece during a call.

### 3.3.3 Selecting Options in Conversation

During a call, press **Left/Right select key** and **OK key** to select options of **Mute/Unmute, Option (Names, Messages or Record)**, etc.

- ❖ Select **Mute/Unmute** to let the other party temporarily can or can not hear your voice;
- ❖ Select **Option** for selection in Menu, such as **Names Messages** or **Record**, with no worry about the ending of conversation.

---

### 3.4 Menu Functions

- ◆ Main Menu Function:
  - i. In standby mode, press **Left select key** to enter main Menu. Scroll **Up/Down** or **Left/Right key** through the menu and select functions according to the prompt on the screen.
  - ii. If the menu contains submenus and further submenus, select options and submenu you want according to the prompt on the screen.
  - iii. Press **OK key** or **Right select key** to set or return to the previous menu. Press **End key** to exit to standby mode.
  
- ◆ Bottom Menu Function:  
If options are displayed on the bottom of the screen, press **Left/Right select key** and then **OK key** to select. Press **OK key** or **Right select key** to set or exit.

The functions of phone are mainly grouped in main **Menu: Names, Messages, Call History, Settings, Toolkit, and Games.**

Please refer to the text hereinafter in this manual in detail.

**Note:** The picture used in this manual are with small icons.

---

## 4      Names

You can save contacts in phone and UIM card. Each contact in phone's memory has three phone numbers.

### 4.1 Finding Records

You can search for a name or number in **Names** in pop-up window.

1. Select **Menu → Names**.
2. Select one contact record and choose **Search** in **Option**. You can key in the first characters of the name you are searching for to view contact directly in All List.
3. Press **Up/Down key** to scroll though the corresponding

---

name(s) and records in the list. Scroll to the name you want, and press **OK key** to view the details or select Option.

All the contacts will be list by the letter of the name. If no contact in the list, “No Record” will be displayed.

## 4.2 Adding New Record

1. Select **Menu—Names**.
2. Select one contact record and choose **Add new entry** in **Option** and then select saving contact in **Phone** or **UIM** card. Add Name/Group/Home number/Mobile number/Work number of the contact in phone (or only add Name/Number for contact in UIM card). See “10. Text Input” more instructions for writing text and character.
4. After the completion of writing, press **Left select key** or **OK key** to save the contact.
5. Scroll to the just-added phone contact to reedit, press **Left select key** or **OK key** to do further operation:
  - ❖ **Edit:** Edit the contact.
  - ❖ **Delete:** Delete the contact.
  - ❖ **Make a call:** Make a call to this contact.
  - ❖ **Send message:** Send message to this number.
  - ❖ **Copy to Phone:** Copy contacts to the phone (available when contact saved in UIM card).

---

- ❖ **Move to Phone:** Move contacts to the phone (available when contact saved in UIM card).
- ❖ **Copy to UIM:** Copy contacts to the UIM card (available when contact saved in phone's memory).
- ❖ **Move to UIM:** Move contacts to the UIM card (available when contact saved in phone's memory).
- ❖ **Set speed dial:** Assign a speed dial number to the phone number (not available for contact saved in UIM card).

**Note:** In standby mode, key in phone number, press **Left select key** to save.

If you save the same number again, the phone prompts to remind you this number is already exist.

### 4.3 Viewing Records

1. Select **Menu→Names**.
2. Select one contact and **View details** of the information.

**Note:** When there is no storage record in Names, it will indicate “No item”.

---

## 4.4 Erasing Records

### 4.4.1 Erasing a Record

1. Select **Menu →Names.**
2. Scroll to the record you want to erase and press **Left select key.**
3. Select **Delete** in **Option.**
4. Press **Left select key.** “Confirm to delete?” indicated on the display.
5. Press **Left select key** to select **Ok.**

### 4.4.2 Erasing All Contacts

You can also **Delete All** the records in Names.

## 4.5 Editing Name of the Contacts

1. Select **Menu→Names.**
2. Scroll to the record you want to edit and press **OK key.**
3. Select **Option** to **Edit** name, and press **Left select key** or **OK key.**
4. Press **Right select key** to erase character of the current name, and rewrite the name.

---

5. Select **Save**, “Succeed to save” appears on the display.

## 4.6 Editing Phone Number

1. Select **Menu→Names**.
2. Scroll to the record you want to edit and press **OK key**.
3. Select **Option** to **Edit** number, and press **Left select key** or **OK key**.
4. Press **Right select key** and press **number key** to erase and key in digit of phone number.
5. Select **Save**. “Succeed to save” appears on the display.

## 4.7 Selecting Group

You can group the stored records into Names.

1. Select **Menu→Names**.
2. Select one record listed in phone's memory, and press **Left select key** or **OK key**.
3. Select option to **Edit group** of Family, Friend, Colleague and press **Left select key** or **OK key** to save. Also you can select ring from the list set already in phone.

---

## 4.8 Setting Number Type

1. Select **Menu→Names**.
2. Select one contact record and choose **Edit** in **Option** and the number type of the contact as Home Number/Mobile Number/Work Number (available for contact saved in Phone)
3. Press **Left select key** or **OK key** to save.

## 4.9 Setting Speed Dial

In standby state, you can make a **Speed Dial** of stored number by keying in one digit (1-9).

1. Select **Menu→Names**.
2. Select one contact record and choose **View details** in **Option** and **Set speed dial** (available for contact saved in Phone).
3. Press **Left select key** or **OK key** and select an **Empty** slot in list.
4. Press **Left select key** or **OK key**. “Succeed to save” appears on the display.

## 4.10 Viewing and Making Speed Dial

### **Viewing** □

Select **Menu→Names**.

---

Select one contact record and choose **Other options** and **View speed dial list**.

### Dialing □

When you select one phone number in the **speed dial list**, you can press **Send Key** to dial. You can also make a call by entering speed dial number in the standby mode.

Method 1: Enter speed dial number, press **Send Key** to dial.

Method 2: Directly hold the Speed Dial Number digit key. If the Speed Dial Number is one-digit, directly hold the digit key. If the Speed Dial Number is two-digit, press first digit key and then hold the second one. For example: If the Speed Dial Number is 25, you should press 2 key firstly, and then hold 5 key, thus it can dial directly.

**Note:** Some handset may not support method 1. Some handset support only one-digit speed dial number, some support both one-digit and two-digit speed dial number.

## 4.11 Memory Status

1. Select **Menu→Names**.
2. Select one contact record and choose **Other options** and **Capacity**.
3. View the number of saved entries and maximum number of entries saved in phone and UIM card.

---

For example: Phone: 8/500, UIM: 4/500, indicating that 500 records entries in Max., out of which eight have been saved in phone. And 500 entries in Max., out of which four have been saved in UIM Card. Please consult with service supplier for storage capacity of UIM card.

## 4.12 Copying all Contacts

1. Select **Menu→Names**.
2. Select one contact record and choose **Other options** and **Batch operation** to copy, move contact in (between) phone's memory or UIM card.
  - ❖ **Copy UIM to phone:** Copy the contact information in Phone's memory (Available only for contact saved in UIM).
  - ❖ **Copy phone to UIM:** Copy the contact information into UIM card (Available for contact saved in Phone's memory).
  - ❖ **Move UIM to phone:** Move the contact information in UIM card to Phone's memory (Available only for contact saved in UIM).
  - ❖ **Move phone to UIM:** Move the contact information in Phone's memory to UIM card (Available for contact saved in Phone's memory).

---

**Note:** This function can copy all the contract records to UIM card, and all the different records or numbers under the same name will be copied accordingly to UIM card one by one as different records.

This function can also copy all the contract records to the phone's memory, and all the different records with same name will be copied accordingly to the phone's memory.

---

## 5      Messages

This is introduction of how to send, receive and erase the messages in your phone.

**Note** ☐ The function introduced hereinafter may differ with different service offered in your area. Please consult with your service provider for more detailed information.

### 5.1 Sending a New Message

Please consult with the service provider to support the network service of sending message. You can only send message to the mobile phone which can receive message.

1. Select **Menu→Messages→New SMS**.
2. Write message text. See “10. Text Input” more instructions for

---

writing text and character.

3. Input the recipients' Phone Number or press **Left select key** to select in Names. Press **OK key** to

- **Send Message:** Send message.
- **Save:** Save the message in **Outbox**.

**Note:** The SMS centers of some cities and regions do not support messages longer than 160 characters. The phone can support 480 English characters max. for SMS length.

## 5.2 Sending Messages

You can send messages to grouped mobile phone which can receive message meanwhile.

1. Select **Menu→Messages→New SMS**.
2. Write message text.
3. Select any receiver in Names or key in the numbers to add to SMS groups separated with semicolon by pressing **# key**. All the phone numbers displayed listed in pop-up window can be reedited. The maximum of receivers not exceed 10 persons.

3. Press **Left select key** or **OK key** to send the message.

---

## 5.3 Receiving Incoming Call while Editing Message

- If you do not want to receive the incoming call, press **End key**.
- If you want to receive the incoming call, press **Send key**. After finishing receiving call, you can continue to edit the message and send.

## 5.4 Reading Message

On receipt of a new message, the phone prompts you by vibration or ringer (up to the setting of silence or ringer in **Settings**). The display indicates “Message” and press **OK key** to view. New message is automatically saved in phone or UIM card. A character on display indicates the memory for message is reaching full. Erase old messages to keep space for new messages.

1. Select **Menu→ Messages→ Inbox**.
2. Scroll to the message you want to read.
3. Press **OK key** to read message. You can press **Up/Down key** to scroll the pages. Or press **Left select key** directly to **Delete** or **Delete all** the message(s) in Inbox.
4. After reading, press **Left select key** to do the options:
  - Reply**  Reply message to sender.
  - Forward**  Forward the message to other recipients.
  - Delete**  Delete the message.

---

- Voice call**  Call back to the message sender.
- Extract**  Extract the number in the message and save in Names.
- Copy to phone (Copy to UIM)**  Copy the message in Inbox of phone's memory or UIM card.

**Note:** The save position of messages can be switched between UIM and Phone according to your selection of UIM or Phone in Msg Settings.

## 5.5 Viewing OutBox

1. Select **Menu→ Messages→ Outbox**.
2. Scroll Message List.
3. Press **OK key** to read message. Or press **Left select key** directly to **Delete** or **Delete all** the message(s) in Outbox.
4. Press **Right select key** to return to the list. Select other options to **Forward**, **Delete**, **Send** the message.

## 5.6 Erasing Messages

Delete and erase old messages to release space for phone's SMS memory. You can select erasing messages when sending or reading messages; erase messages one by one or all in Inbox, Outbox and UIM card.

---

### **5.6.1 Erasing a Message**

1. Select **Menu→ Messages**.
2. Select messages location: **Inbox, Outbox**.
3. Press **Up/down key** to select to-be-erased messages.
4. Press **Left select key** directly to **Delete** the message in Inbox or Outbox. Select **Delete** to erase messages. “Delete?” appears.
5. Select **Ok** to erase this message.

### **5.6.2 Erasing All Messages**

1. Select **Menu→ Messages**.
2. Select to-be-erased messages in **Inbox, Outbox**.
3. Press **Left select key** directly to **Delete all** the message(s) in Inbox or Outbox.

## **5.7 Reading and Setting Voice Mail**

Before using Voice Mailbox, please consult with network provider to confirm that the function of voice mail box has been activated. After your successful setting, network will automatically transfer divert incoming call(s) to your voice mail box, and send message(s) to your phone.

Select **Call Voicemail** to read the message and then dial voice

---

mail box number to listen to the leaving message following guide prompt.

Select **Setting No.** to set the voice mail number. To read your voice mail, dial the voice mail box number in standby mode.

**Note:** The function needs network support.

## 5.8 Message Settings

You can set your message box before you use it, such as, **Save Position, Auto Save, Auto Delete, Set Idiom, Alert Setting, Delivery Ack, Msg Priority, and Memory Status.**

### 5.8.1 Save Position

1. Select **Menu→Message→Msg Settings→Save Position.**
